DISCUSSION:

The Clinical Evaluation of Language Fundamentals 5th Edition (CELF-5) is a comprehensive language assessment and screening tool used to assess language skills of students 5.0 – 21.11 years of age. The CELF-5 provides accurate diagnostic information with current normative data, reflecting today’s diverse population. The screening instrument is used to identify critical language needs in students who may be at risk for language disorders. As part of the K-12 language evaluation process, speech language pathologists are required to administer one or more standardized norm referenced instruments designed to measure language skills.

The CELF-5 screening and assessment instruments are being requested in order for Brevard Public School’s Speech Language Pathologists to comply with current evaluation policies/procedures and to assist school teams with the determination of Exceptional Student Education eligibility and services.

CONTRACT TERM:

Pricing quotes expire on June 30, 2014

CELF-5® Screening Test

Elisabeth H. Wig, PhD, Wayne A. Secord, PhD, Eleanor Semel, PhD

Overview: Quick, reliable, and easy to use—now includes a pragmatics screening!

Qualification Level: B

Age Range: 5:0 through 21:11

RTI Tiers: RTI Level 1

Administration: Verbal response to stimuli

Completion Time: 15 minutes

Scores/Interpretation: norm-based criterion scores by age

Publication Date: September 2013

Product Details

Available now!
The CELF-5 Screening Test helps you quickly determine if a student needs further testing to identify a language disorder. Appropriate for students ages 5:0 through 21:11, this tool is the only standardized screening measure available for older school-aged students!

Features and Benefits

- Saves you time, with administration and scoring taking only 15 minutes.
- Now includes a pragmatics screening, in addition to items that help you screen morphology, syntax, and semantics skills.
- Easy to administer and score
- Reduces administration time for follow-up testing with the CELF-5; screening items are a subset of the diagnostic CELF-5, so that you can simply transfer many of the screening test responses to the CELF-5 protocol. No need to re-administer the test items, reducing CELF-5 administration time!
- Enables cost-effective universal screening for children in Kindergarten round-up.
- Can also be used with students through age 21, providing the only screening measure with research-based criterion scores for older school-age students.
- Presents research-based cut scores by age based on a standardization sample of more than 2,300 students throughout the United States. The test items were subjected to rigorous analysis of bias. Scoring rules are sensitive to many dialects use in the U.S. and diverse cultures.
- Uses colorful illustrations that keep students engaged.
